

## Bump Mapping

---

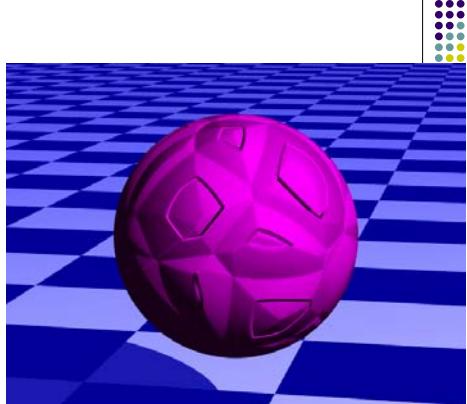

---

---

---

---

---

---

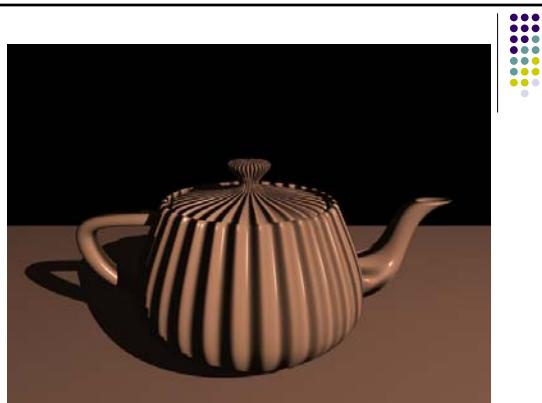

---

---

---

---

---

---

---

---

---

---

---

## Bump mapping

- “Fooling” the shader by altering normals
- Cheaper than changing the geometry

---

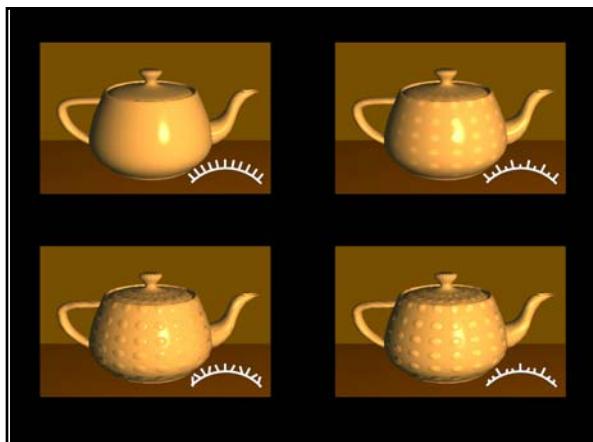

---

---

---

---

---

---

---

---

---

---

---

---

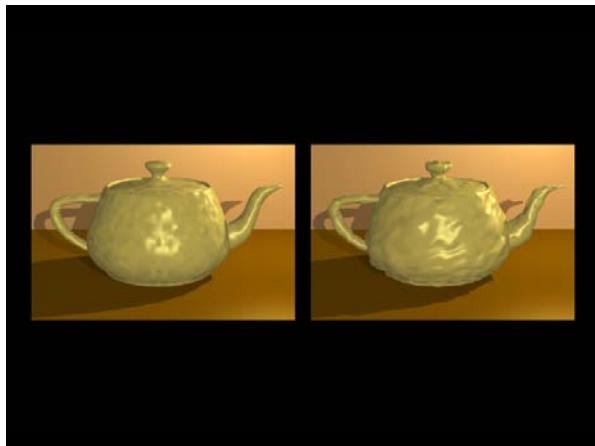

---

---

---

---

---

---

---

---

---

---

---

### Bump mapping in POV-Ray

```
#declare asphere =
    sphere<0,0,0>, .95
        pigment {color rgb <1., .6, .5>
    }

object {
    asphere
    normal{bumps 0.4 scale 0.2}
    finish {phong 1 phong_size 100
            ambient .3 diffuse .7}
    translate <-2, 1, 0>
}
```

---

---

---

---

---

---

### Just the normal clause ...

```
normal{bumps 0.4 scale 0.2}
normal{dents 1.0 scale 0.05}
normal{ripples 1.0 scale 0.2 frequency 3}
normal{waves 1.0 scale 0.2 frequency 5}
normal{wrinkles 1.0 scale 0.2}
normal{bumps 0.2 scale 0.2}
```

---

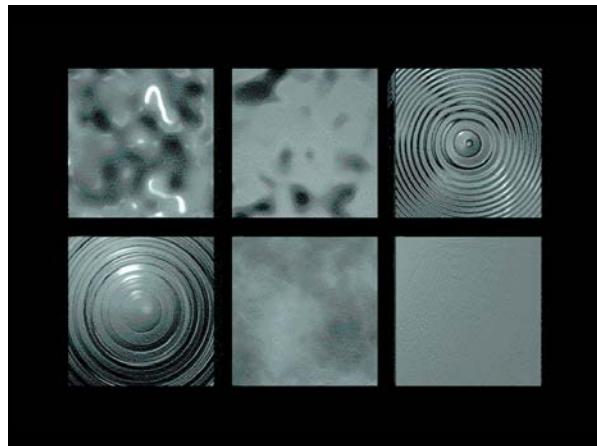

---

---

---

---

---

---

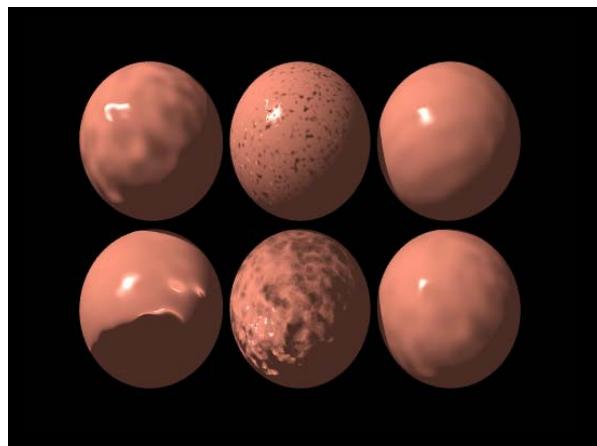

---

---

---

---

---

---

---

---

---

---

---

## Bump mapping

- Waves

`normal{ waves 1.0 scale 0.2 frequency 5 }`
- The waves pattern looks similar to the ripples pattern except the features are rounder and broader.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

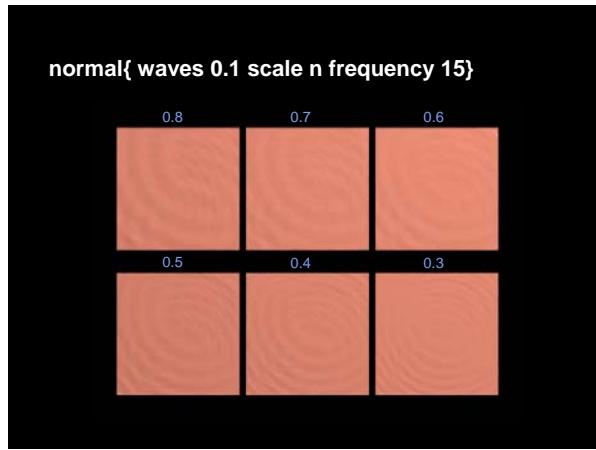

---

---

---

---

---

---

---

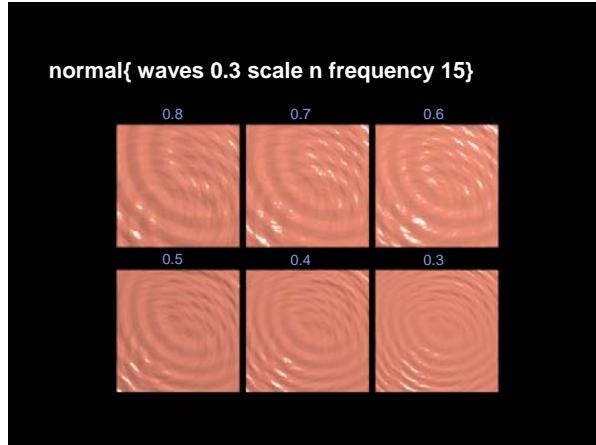

---

---

---

---

---

---

---

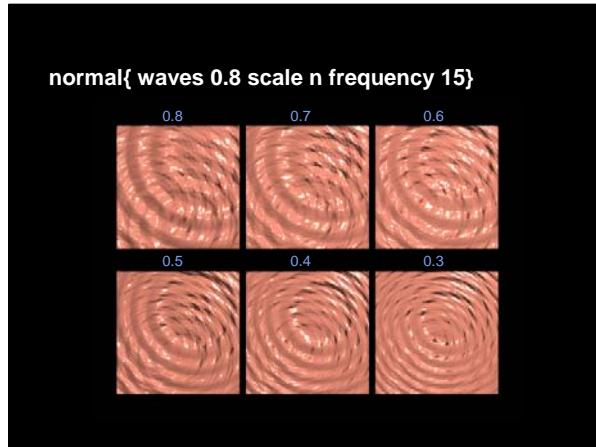

---

---

---

---

---

---

---

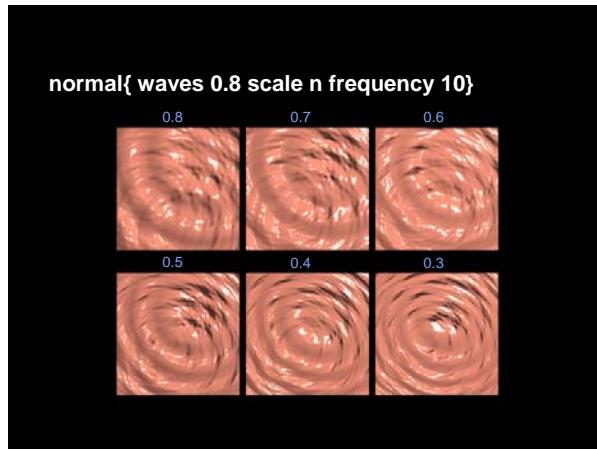

---

---

## Bump\_map

- Instead of placing the color of the image on the shape like an `image_map`, a `bump_map` perturbs the surface normal based on the color of the image at that point
- Colors are converted to gray scale before calculating the height of the bump

---

---

---

---

---

---

---

```
sphere { <0, 0, 0>, 25
    pigment {Blue}
    normal {
        bump_map {
            png "bumpmap_.png"
            bump_size 5
            interpolate 2
            once
        }
        scale 50
        translate <-25, -25, 0>
    }
    finish {ambient 0.2 diffuse 0.7 specular 0.6}
}
```

---

---

---

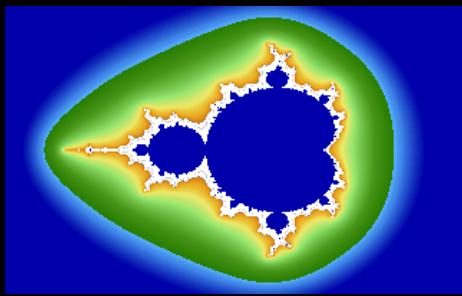

---

---

---

---

## bump\_map

---

---

---

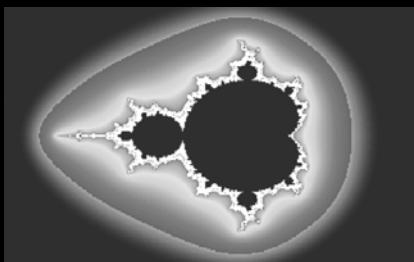

---

---

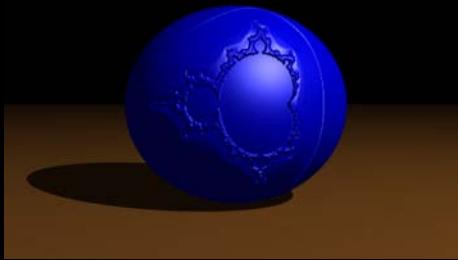

---

---

## bump\_map

## Result

## For texture design

- [www.rene-schwietzke.de/povray/index.html](http://www.rene-schwietzke.de/povray/index.html)  
Wonderful images showing all of the textures that come with POV-Ray.
- Architecture  
[sourceforge.net/projects/ute](http://sourceforge.net/projects/ute)  
Source and executable for creating and previewing textures for POV
  - A little tempermental
  - Written in VB; source freely downloadable. Improvements (FP?)

## For texture design

- Texture Magic

[private.homepages.intershop.de/rene/povray/tex\\_mag.html](http://private.homepages.intershop.de/rene/povray/tex_mag.html)

Excellent preview software. Oldie but goodie.  
Free for 60 days.

- POVMan

---

---

---

---

---

---

## Soft focus

- Aperture
- Blur\_samples
- Variance
- Focal Point

---

---

---

---

---

---

---

```
camera {  
    location <3.0, 6.0, -10.0>  
    look_at <2.0, 1.0, 1.5>  
    direction <0,0,2>  
    focal_point <2.0, 1.0, 1.5>  
    aperture 1.5      // much blurring  
    blur_samples 60   / more samples, higher quality  
    variance .15  
}
```

---
