

## Light effects, Fog

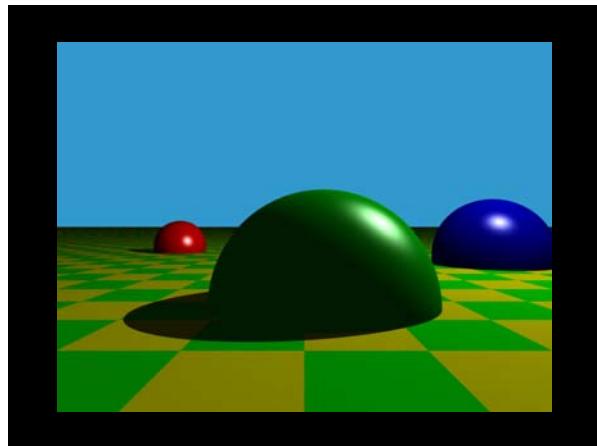

### Fog

- Distance
  - 36.8% of the background still visible
- Color
- `rgbf <0, 1, 0, .4>`
  - 40% of light filtered through <0,1,0>
  - 60% of original light passes through unfiltered (original values)

```
fog { distance 150
      color rgbf <0.3, 0.5, 0.2, 1.0>
      turbulence 0.2
      turb_depth 0.3 }
```

---

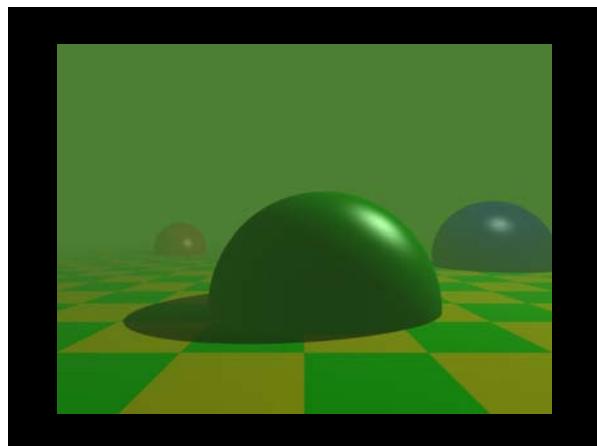

---

---

---

---

---

---

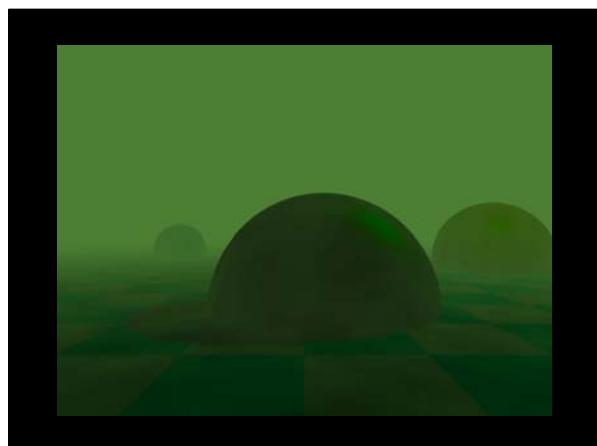

---

---

---

---

---

---

---

---

---

---

---

## Ground Fog

- fog\_type 2 // ground fog
- fog\_offset 10 //constant density below offset
- fog\_alt 4 //rate at which fog fades above offset

---

---

---

---

---

---

```
fog {  
    distance 150  
    color rgbf<0.3, 0.5, 0.2, 1.55>  
    turbulence 0.2  
    turb_depth 0.3  
    fog_type 2  
    fog_offset 10  
    fog_alt 4  
}
```

---

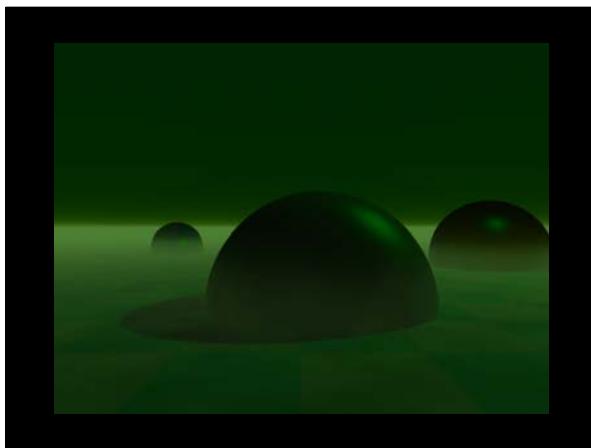

---

---

---

---

---

---

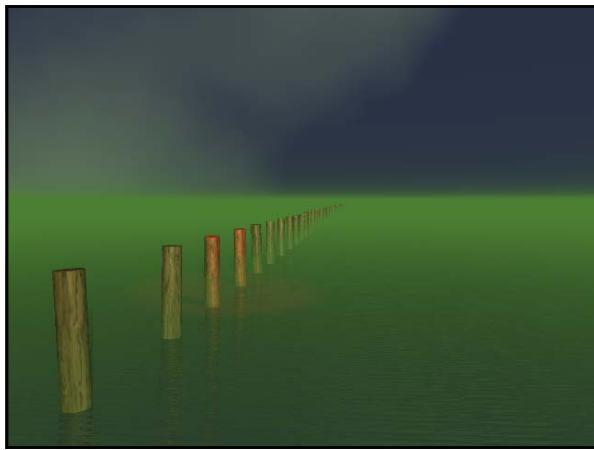

---

---

---

---

---

---

---

---

---

---

---

**Layered Fog**

- Can declare more than one type of fog
- All will participate

---

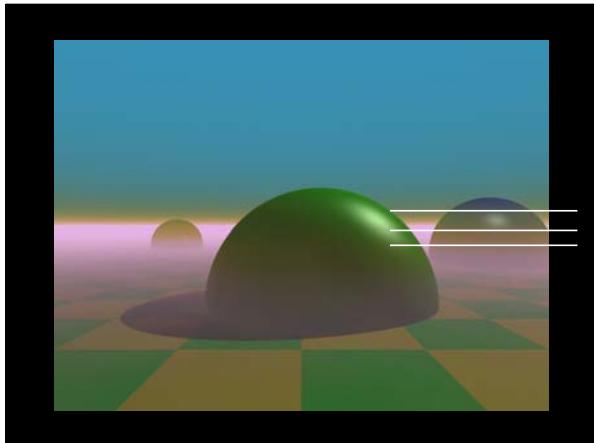

---

---

---

---

---

---

---

---

---

---

---

## Light and media

### Interior

- Media
- Emission
- Absorption
- Scattering

---

---

---

---

---

---

---

## Lights are invisible

```
light_source {<3,4,2>
    color White
}
```

---

---

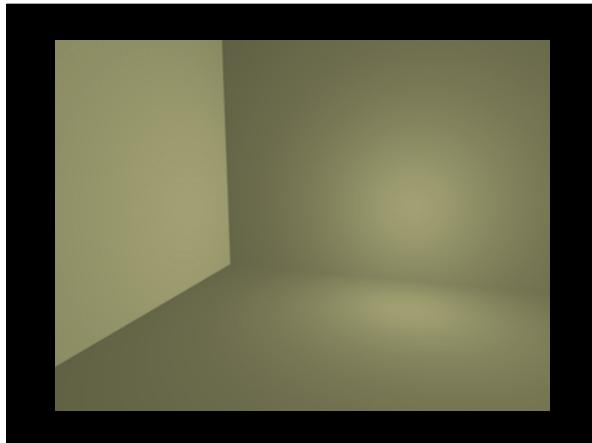

---

---

---

---

---

---

---

---

---

---

---

---

## Making the light visible

```
light_source {<3,4,2>
    color rgb <1,.95,.8>
    looks_like {
        sphere { <0,0,0>,0.2
            pigment {color <1,.95,.8>} 
            finish { ambient 1 }
        }
    }
}
```

---

---

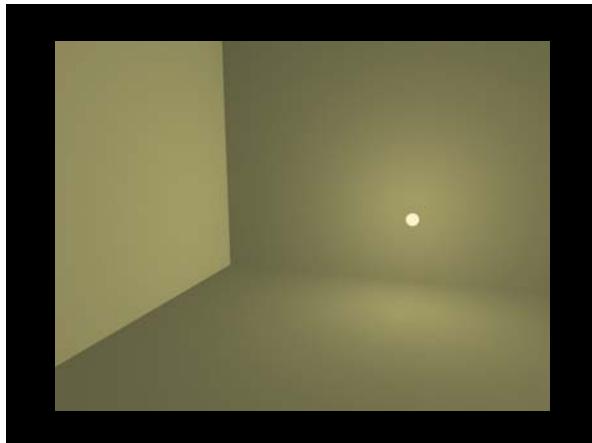

---

---

---

---

---

---

---

---

---

---

---

---

## Glow

- Hollow
- Media
  - Inside interior statement

---

---

---

---

---

---

---

## Media

- Emitting
- Absorbing
- Scattering

---

---

---

---

---

---

## Emitting example

- “Emits” light (not really, more like ambient)
- Uses Density
  - Pattern (spherical, wood, etc.)
  - Density\_map

---

---

---

---

---

---

```
sphere { 0,1 pigment { rgbt 1 } hollow
    interior
    { media
        { emission .4
            density
            { spherical density_map
                { [0 rgb 0]
                    [0.5 rgb <.2,0,0>]
                    [0.75 rgb <.5,0,0>]
                    [0.8 rgb 0]
                    [1 rgb 0]
                }
                turbulence .2 octaves 1
            }
        }
    }
}
```

---

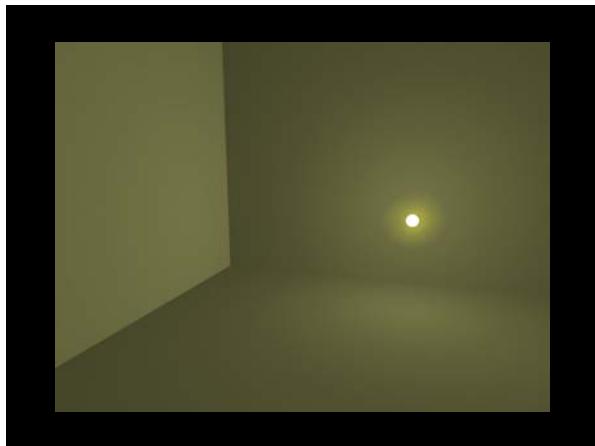

---

---

---

---

---

---

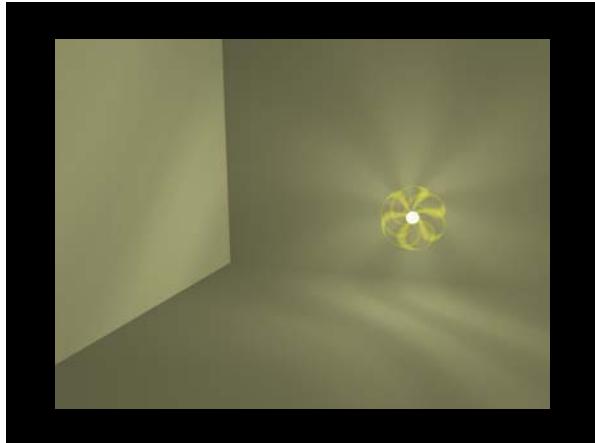

---

---

---

---

---

---

---

---

---

---

---

## Scattering

- Light interacts with media
- Objects can cast shadows into media
- Statement:

```
media {  
    scattering {<type> <color> <extinction>}  
    [ samples <min> <max> ]  
}
```

---

---

---

---

---

---

## Scattering

- Types
  - 1 Isotropic
  - 2,3 Mie haze, Mie murky
  - 4 Rayleigh
  - 5 Henyey-Greenstein

---

---

---

---

---

---

## Scattering

- Extinction
  - How fast the scattering media absorbs light
  - Useful when the media appears too dark or dense

---

---

---

---

---

---

## Samples

intervals n  
samples min max

---

---

---

---

---

---

## From the POV-Ray 3.6 release

micro.pov  
Emission, Scattering, Density

---

---

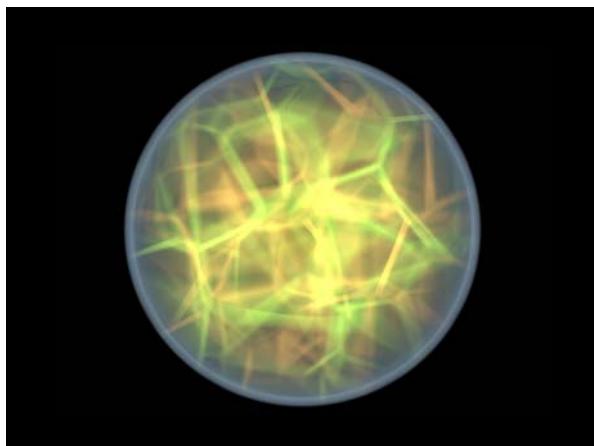

---

---

---

---

---

---

---

---

---

---

---

---

## Scattering Example

- Lights and Camera
- Room
- Scattering Media

---

---

---

---

---

---

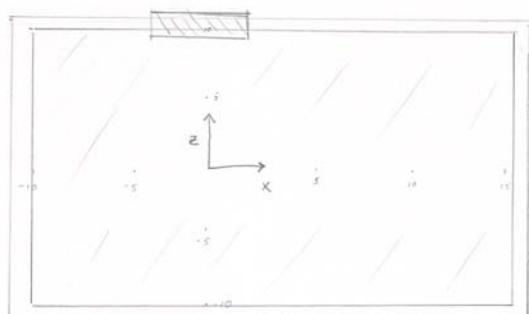

---

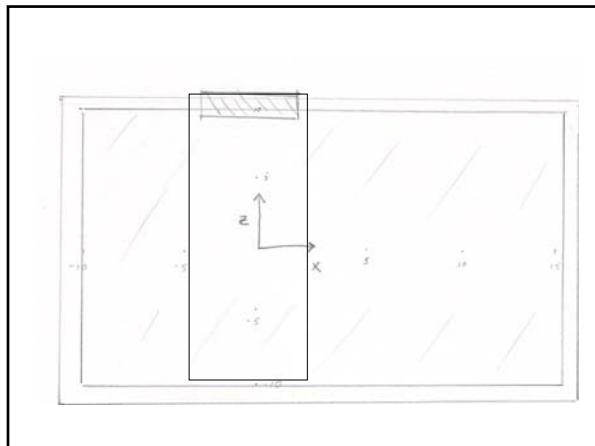

```
global_settings { assumed_gamma 1 }

camera { location <14.9, 1, -8>
          look_at -z
          angle 70 }
light_source { <10,100,150>, 1 }
background { rgb <0.3, 0.6, 0.9> }

light_source { <14, -5, 2>, 0.5
               media_interaction off }
```

```
// Room
union
{
    difference
    {
        box { <-11, -7, -11>, <16, 7, 10.5> }
        box { <-10, -6, -10>, <15, 6, 10> }
        box { <-4, -2, 9.9>, <2, 3, 10.6> }
    }
    box { <-1.25, -2, 10>, <-0.75, 3, 10.5> }
    box { <-4, 0.25, 10>, <2, 0.75, 10.5> }
    pigment { rgb 1 }
}
```

---

---

---

---

---

---

```
// Scattering media box:  
box  
{ <-5, -6.5, -10.5>, <3, 6.5, 10.25>  
  pigment { rgbt 1 } hollow  
  interior {  
    media  
    { scattering { 1, 0.07 extinction 0.01 }  
      samples 30,100  
    }  
  }  
}
```

---

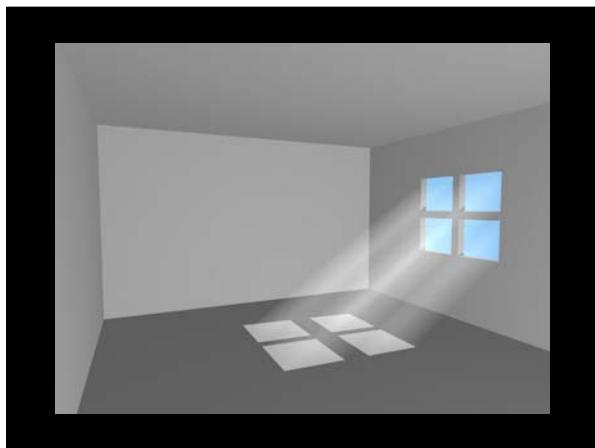

---

---

---

---

---

---

---

---

---

---

---
