Some Words on H2

If you want to run the queries using set intersection and difference, you will need a relational database system supporting INTERSECT and EXCEPT. A nice, easy-to-install package is the H2 database engine which you can download at http://www.h2database.com.

After installation run the H2 console (not in command line mode); this should bring up a browser window with the following login screen.

Saved Settings:	Generic H2			
Setting Name:	Generic H2		Save	Remove
Driver Class:	org.h2.Driver			
JDBC URL:	jdbc:h2:test;h	sqldb.default_table_l	type=cached	
User Name:	sa			

Figure 1: H2 login.

Click on the "connect" button, and you should see a window as in Figure 2:

Figure 2: H2 console.

You can use the window on the right to input SQL (below you will see the results. To create the company database, copy/paste the file "comp.sql" into the window, and hit the "run" button. As a result you should see something like the screen in Figure 3. You can now try running a simple query as in the

Figure 3: H2 console with database.

screen shot in Figure 4. To log out, hit the red symbol on the top left.
